

# Corporate Profile

# Executive Summary

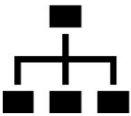

**We are** one of the fastest-growing EV charging companies in India. With its Management Team including Founder/Promoters from the strong power sector background including Solar Power/Renewable Energy project development in Roof Top and utility-scale.

The key differentiator is its Technology Platform (Mobile Application & Charging Station Management System) which is powered by IoT, through 'Over-the-air' flow of data and use of Cloud base solutions to give 'Best In Class' Customer experience by making "Unmanned Charging Stations" which are remotely monitored & controlled, thus making 24x7 available to EV users.

It aims to be a **vertically integrated EV Charging company** with an aim to serve through ONE MILLION charging points by 2030.

**Company Overview**

**Business Mix**

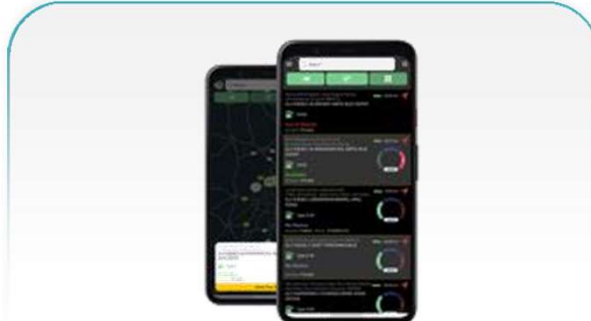

- Renewable Energy Integration
- Energy Storage Solution for Charging Station
- Advertising Platform
- Cloud-Computing & Automation (Un-manned Charging Stations)
- Data Analytics Platform

**Key Drivers**

# Hardware + Software + Services | Energy-as-a-Service

## EV Fast Charging Networks & Battery Swap Stations

- Unmanned Fast DC & Solar-integrated
- Huge Savings in Fuel & Running Cost
- No carbon emissions
- Available at regular distance intervals

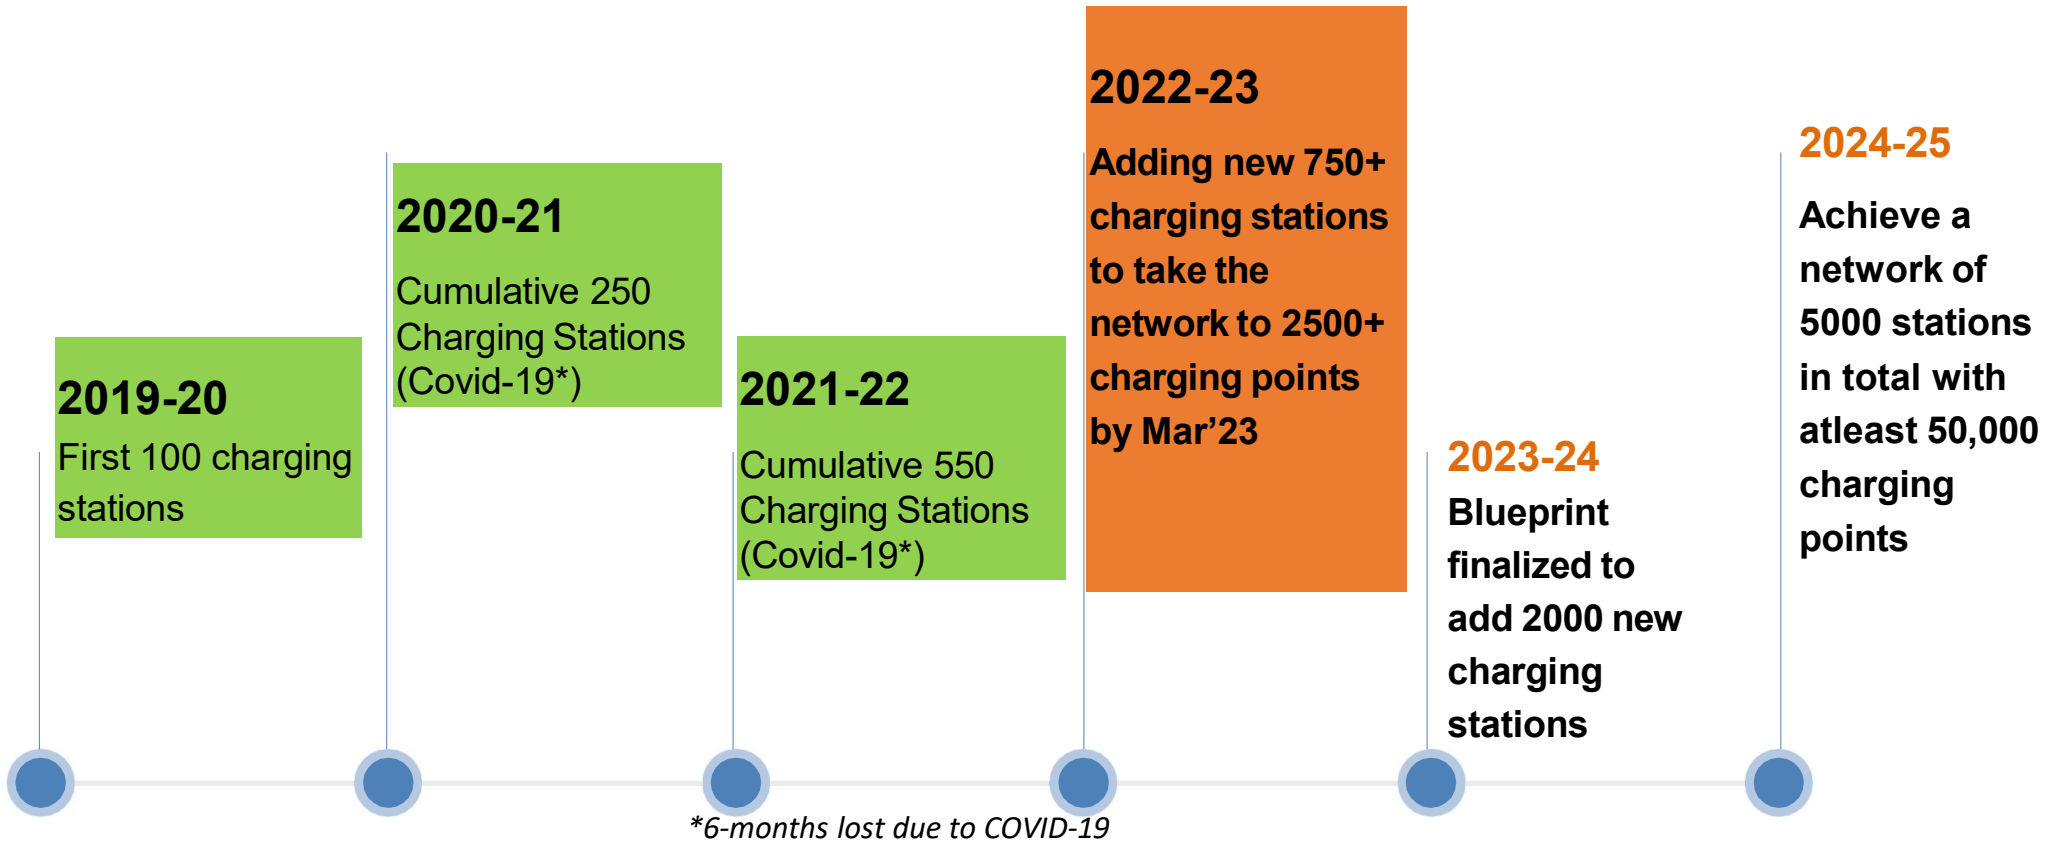

## App-driven & Over-The-Air (OTA)

- Real-time Availability Status
- QR Code to pay & charge
- Book and navigate to charging station
- Real-time State of Charge (SoC) & time left

## Cloud-based Technology

- Nicknamed CHARGE+Cloud – our own proprietary technology to run the IOT-based network of EV Chargers
- Network Service Provider (NSP) to DISCOMs
- Live Dashboard & Data Analytics
- Network Operating Centre (NOC)
- Smart Charging as per peak load & off-peak hours

# Progressive EV Charging Network

# Smartphone App | Both on iOS & Android

## Find Nearby Charge Spot

Get your Nearby most Convenient Charge Spot with Real Time Availability of Charge Spot to charge your EV

## Charging Options

Choose to charge your EV by units or by Amount

## Start Charging

Get OTP to authorize and tap to start charging your EV

## Save EV information

Save your EV detail to get an accurate charging session time

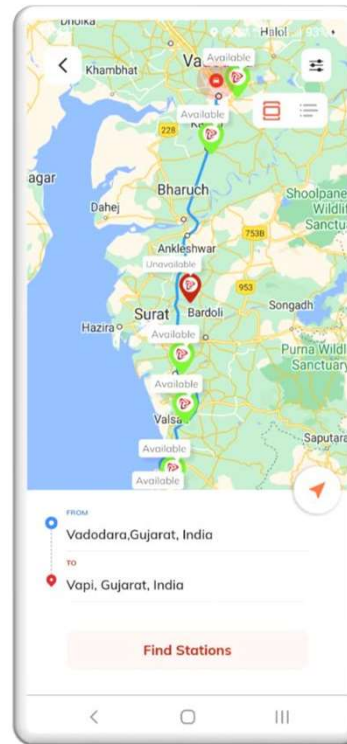

## View Charging History

Track your EV usage with Cost, Energy and Distance details

## See the Charge Station

Easily know surrounding amenities and conveniences available in vicinity of Charge Spot

## Reserve Time Slot

Book your time slot in advance and save your time or facility

## Payment Options

Make your payment easier and faster with wallet/credit cards/debit cards/Net Banking

## Get Notified

Receive notifications when charging cycle starts and when it is completed

## View Booking Log

Track your scheduled and past booking history

## Save Favorite Spot

Quickly find Charge Spot which one use frequently

## Offers and Referrals

Stay updated with the latest offers and earn from referrals

# Pioneering New Smart Charger Design

**AC TYPE 2  
MAX CHARGER**

*India's first EV Charging Station with  
Digital Advertising Platform !*

**CCS2  
FAST CHARGER**

**AC TYPE 2  
MINI CHARGER**

# Pan-India Partnership Formed With Marriott India

Fast DC Charging Network Across 100+ Properties in India

# Key Partnerships Formed & Under Rollouts

India's first ever roaming platform

Public Charging Stations

Outlets as PoS in Tier-1/2 cities

PPP Partnership

Rapid Charging Networks

Co-locating chargers on the network

India's first mega partnership for hospitality industry

EV charging networks for fleet
